

## RE EL5 LE3

### Dimmable Dimmer for Led Lamps (trailing edge)

#### Description

- Regulador en formato modular para el control de lámparas LED regulables por corte a fin de fase.
- Control by conventional pushbuttons, potentiometer or 0/10 signal.
- Memory function.
- Built-in potentiometer which allows the dimming from the device.
- DIN rail mounting.
- Control knob to select the best dimming curve for the installed lamps.
- Anti-panic input for safety systems: in case of emergency, the lamps can be switched-on at maximum level without taking into account the control.

#### Technical Characteristics

Reference	RE EL5 LE3
Power Supply	230V~ 50Hz
Consumption	1,5W
Type of Load	Dimmable 230V Led Lamps (trailing edge) Dimmable 12V with electronic transformer
Maximum Load	5W ~ 1000W
Control	Pushbutton (no lighted), Potentiometer, 0/10V or 1/10V signal
Dimensions	5 modules of width
Connection Terminals	Up to 6mm <sup>2</sup> connection wire
Working Temperature	0°C ~ +40°C
Protection Degree	IP20, according to UNE EN20324
According to the Standard	UNE EN60669-2-1
